# City Smart Golf

- mini golf at a higher level

**City Smart Golf is the perfect solution if you want to install a mini golf facility that attracts players of all ages and skill levels. City Smart Golf consists of artificial grass mini golf holes built on site and available in three sizes. Choose between 9, 12 and 18 holes.**

Do you want to upgrade your existing mini golf facility into something new and exciting? Do you want to offer your customers a new, unique playing experience? If so, a City Smart Golf from City Golf Europe is the answer.

City Smart Golf generates high profits and creates many happy returning customers.

## **Easy and difficult playing options**

City Smart Golf resembles real golf with undulating fairways and greens. The holes are designed to ensure a fun and exciting playing experience. Each hole has an easy and a difficult playing option.

City Smart Golf takes mini golf to a higher level using our realistic artificial grass allowing a 'true' ball roll as though you were playing on a freshly cut green!

## **Optimal playing experience**

The holes are built out of natural materials and have artificial grass playing surfaces: fine fairway grass, coarser rough grass and white grass for the "sand bunkers". Each hole from 1 to 18 is unique and carefully designed and tested for optimal playing experience.

Everyone can play and have fun together whether families, teenagers or golf pros. Ideal for parties and corporate events and the facility is DDA compliant.

## **All inclusive**

Our skilled installation team at City Golf Europe construct the courses at your chosen location taking care of everything from design to ground works to the completed playing surfaces and connecting pathways.

The holes are decorated with natural stone in different sizes and designs.

Hole cups, flag poles, flags, clubs and balls are also included. After 2 to 4 weeks your City Smart Golf course is ready for use.

*City Smart Golf, 18 holes*

**High profit**

City Smart Golf gives you a new source of earnings and makes your existing business more profitable.

City Golf Europe AB is the European market leader. We have built more than 2,400 mini golf courses since the company started in 1940.

## Easy to buy in 2 stages

The philosophy behind City Smart Golf is that our price is all-inclusive. It is easy to buy and a profitable investment.

Stage 1: Contact us directly or request information via our website. We will send you sample plans, 3D drawings and the purchasing conditions.

Stage 2: At the next stage, we send you a checklist to complete. On the basis of this, we prepare customised drawings for your project and a draft agreement. The price for this stage is 100 EUR\*.

## Your commitments

City Smart Golf is a cost-effective mini golf course. To help us design and build the facility quickly, please help us by providing:

### For design:

- A plan & photographs of your plot (ideally including a Google Earth image)
- Information about the ground conditions

### For construction:

- Planning permission and any necessary permits
- Construction fencing if needed
- Electricity and water supply
- Use of staff rooms
- Storage areas for materials/equipment

## More information?
