Durch Qualität – mehr Freude am Spiel!

Blue Planet

Kopenhagen - Dänemark / Copenhagen - Denmark

Wasser & Sand gehören zu den wichtigsten Ressourcen dieser Erde. Zweifellos. Beides sind aber auch die beliebtesten Spielmaterialien.

Undoubtedly water and sand are two of the most important elements on this earth and unquestionably both are the most popular play materials in any playground.

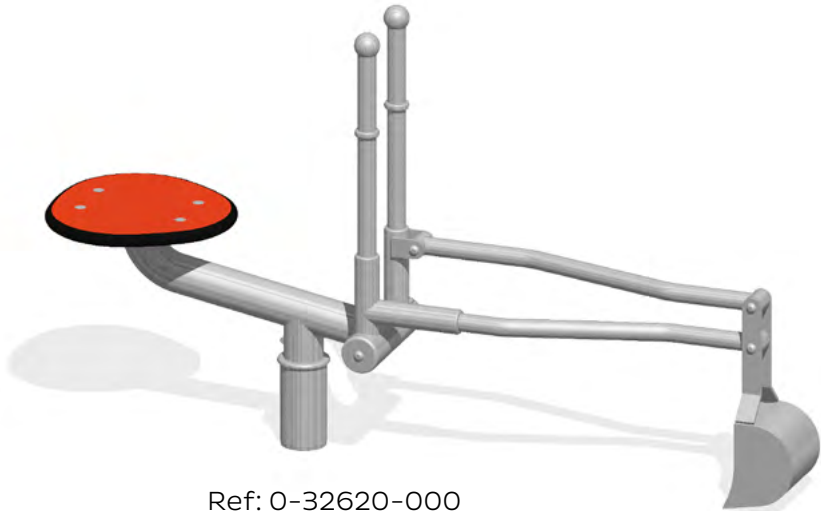

Kombiniert mit unserem Wasserspielsystem aus Edelstahl werden sie zu Magie auf jedem Spielplatz. Das Kopenhagener 3XN Architektenteam hat sich bei der Planung des Blue Planet dazu entschlossen, ihr fantastisches Bauwerk um eine ganze Wasserspiellandschaft zu bereichern. Resultat ist eine faszinierende Spielanlage, die sich excellent in die vielfach prämierte Architektur des Blue Planet einfügt.

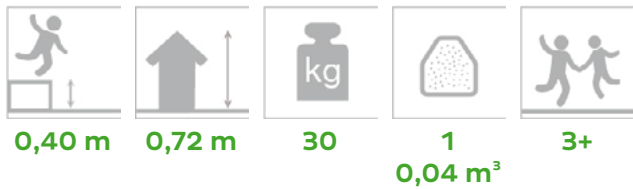

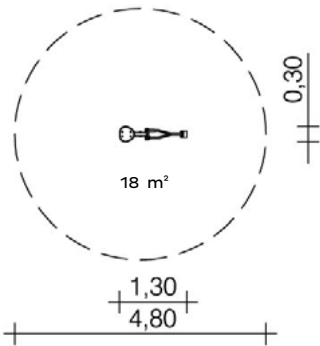

Using our stainless steel water play system water and sand turn into a fascinating play material for children in any playground. During the planning of the Blue Planet project, the team of architects from 3XN in Copenhagen decided to add a K&K built water play landscape to their designed project. The result is a fascinating playground that complements the award winning architecture of the Blue planet

WASSER SPIEL

Wasser ist ein natürliches Element und bei den Kindern ebenso beliebt wie Sand. Wenn sie gleichzeitig mit Wasser und Sand nach Herzenslust spielen, können sie ihre Phantasie und Kreativität entfalten. Unsere Wasserspielgeräte können beliebig erweitert und den örtlichen Gegebenheiten hervorragend angepasst werden.

Water play

Water is a natural element. Children love water as much as they love sand. Playing with water and sand opens up opportunities for imagination and creativity. We can endlessly expand our water play structures and adapt them appropriately to local site conditions.

K&K – Water play
